

**TO WHOM SO EVER IT MAY CONCERN**

M/s ACV Systems, New Delhi have executed the job of HVAC for our 1000 TPA Amoxicillin Trihydrate project, which is worlds largest single stream facility. The scope of work included design, supply, installation, testing, validation and commissioning of the entire air-conditioning work. The project was executed as per US FDA and cGMP guidelines. Th entire job of HVAC was completed in a record time of 4 month with a contract value of INR 7.0 million.

The concept, installation and performance of the system has also been applauded by our principals, M/s DSM and Gist Brocades of Netherlands. The system was successfully qualified, tested and validated through stringent audits conducted by in-house and external agencies.

Contract management under the overall supervision of Mr. D. K. Aggarwal including supply of material, work allocation has been excellent. We wish all success to M/s ACV Systems in their all future ventures.
